

an informative Brochure of

>>>Introduction

We are known as one of the richest people in Water Resources, but yet, deprived of sufficient electricity. Very few population enjoys hydro power electricity. Because of uneasy topography and expensive cost of initialization and installation, alternative energy (Solar energy) has been sensed as an easy way to light up remote villages.

Feeling the energy needs of whole nation, a group of professional Nepali citizens have established SunShine Energy Pvt. Ltd. as another medium to fulfill alternative energy needs. Established in Bhadra 2061 (2004 AD), SunShine has been operating for whole nation from its starting phase.

Situated in a easy accessible area of historical city Lalitpur, it owns sufficient space for official and manufacturing operation.

>>>Goal

"Fly high and access the Moon", poet Devkota said.

Our distinguished goal is to make SunShine a powerful brand that anyone trusts us blindly. We aim to install TRUST in ONE BRAND, SunShine. Whatever we promote, will be noble.

We support villages plying them lights. We give high importance to the best distribution of qualitative products those comfort lives and broaden creative ideas.

We wish our endusers feel proud of spending their valued money in something, from SunShine.

>>>Products

Various components and systems related to renewable and alternative energy are our products.

The solid focus has been different sizes of Solar Home Systems (SHS). **Analysing a requirement well, we are able to install a One Light Portable System upto a full Solar Powered Office in remote area.** Solar Modules, Batteries, Charge Controllers, Lights and other components imported from different countries are our products those are durable, reliable; and affordable so far.

We offer SHS from 10/12 watts to 100 or bigger watts which light up from 2 to 10 (or more) lights respectively. Bigger systems easily run BW/Colour Television, Radio / Tape/CD/VCD, Telephone Set and other appliances.

Alongwith, we always forge to initiate innovative and unique energy products those we believe, will help villagers improve their living standard.

Solar Water Pumps, Solar Street Lighting Systems, Solar Powered Systems at Remote Offices, Portable Solar Power Systems for Trekking Purpose alongwith MycroHydro are among our visionery products.

Please view product price-list.

>>>Guarantee/Warranty

Solar Modules contain a warranty of 10 to 25 years against their power loss while Batteries contain 2 years warranty. Other electronic components cover 2 years warranty and tube contains 90 days'.

Though, guarantee and warranty varies depending on the product and manufacturer. Please contact for specific information.

>>>Service

Customers' satisfaction is the only motto of every serving organisation; we have the same as well. Sales after service makes an end-user happy.

Basically, we provide After Sales Service periodically, for 2 years of installation. Being a tough job, we will act our best to cope with After Sales Service issue.

To add up, we promise to serve our brands anywhere.

>>>Association

We will be always excited to shake hands, in energy work, from a single user customer from a remote village; to small community based organisations; NGOs; INGO; Government Institutions and National and International Donor agencies including competitor companies. We believe in team work which enables a qualitative work as well as beneficial to more.

We will be grateful to learn and share ideas.

>>>Contact

We need your valuable comments, complaints and suggestion to grow up. Please feel free to share any kind of information with us.

Thank You.
